**Ubicaciones:** Asylum Avenue at Woodland Street (St. Francis), Farmington Avenue at Girard Avenue (West Side Square), Main Street at Westland Street (Parker Memorial Community Center), Broad Street at Brownell Avenue (Boys & Girls Club and the Learning Corridor), Wethersfield Avenue at Elliott Street (Bulkeley High), Newington Avenue at Marion Street (South West), Albany Avenue at Blue Hills Avenue (Biblioteca Sucursal de Albany)

**Locations:** Asylum Avenue at Woodland Street (St. Francis), Farmington Avenue at Girard Avenue (West Side Square), Main Street at Westland Street (Parker Memorial Community Center), Broad Street at Brownell Avenue (Boys & Girls Club and the Learning Corridor), Wethersfield Avenue at Elliott Street (Bulkeley High), Newington Avenue at Marion Street (South West), Albany Avenue at Blue Hills Avenue (Albany Branch Library)

**Quien se Beneficia:** Todos los que utilizan el sistema de transporte, incluidos los residentes y visitantes, se beneficiarán de la adición de asientos en las paradas de autobús donde no existen asientos ahora, una mejora que se ha demostrado que reduce el tiempo percibido antes de la llegada del autobús.

**Who Benefits:** All who use the transit system, including residents and visitors, will benefit from seating added at bus stops where no seating currently exists, an improvement shown to reduce the perceived length of time before bus arrival.

**Descripción del Proyecto:** Tener la opción de sentarse mientras esperan es un alivio para muchos pasajeros, especialmente aquellos con problemas de movilidad y/o aquellos que transportan cargas pesadas. La adición de áreas de abordaje pavimentadas con concreto adyacentes a la acera mejorará la experiencia de tránsito para quienes usan sillas de ruedas u otros dispositivos con ruedas y facilitará el despeje de las áreas de abordaje después de una nevada.

**Project Description:** Having the option of sitting while waiting is a relief to many passengers, especially those with mobility issues and/or those carrying heavy loads. The addition of concrete-paved boarding areas adjacent to the curb will improve the transit experience for those using wheelchairs or other wheeled devices and ease the clearance of boarding areas after snowfall.
